

**ACROSS**

- 1 Large bodied and/or having heavily-structured anatomy.
- 4 The site where Donald Johnson discovered Lucy.
- 7 The downwardly-directed passage way through the skull for the spinal cord.
- 9 Locomotion (walking, jogging, running, etc) on two legs.
- 10 A forward projection of the face below the nose.

**DOWN**

- 2 When males and females of the same species vary greatly in size.
- 3 The first Australopithecine fossil specimen to exhibit an endocranial size that would have been fairly similar to that of a modern ape.
- 5 A change in gene allele frequencies from one generation to the next.
- 6 The group that includes humans and our bipedal fossil relatives.
- 8 The genus name for humans.
